**Project Part 9**

Who: Austin Curtis, Jacob Brauchler, Devon Connor, Ryan Craig

Title: Gas Mileage Tracker

Methodologies: Agile, Pair Programming
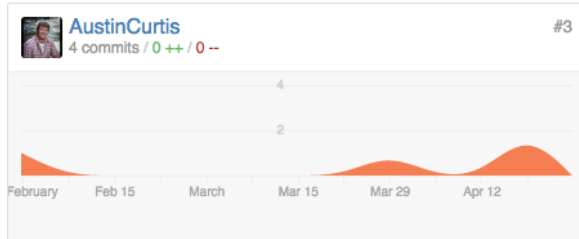

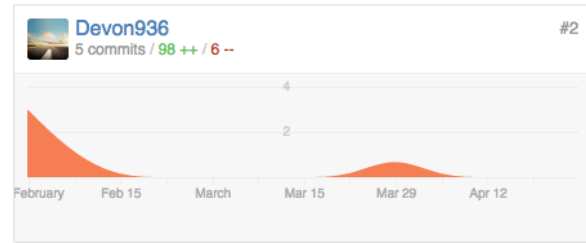

Project Tracker: https://trello.com/b/ogFj2eyx/gas-mileage-tracker

Project Plan:

VCS: Github

VCS Link: https://github.com/jabr9983/Gas_Mileage_Tracker/tree/Final

Our Final version of the app that we want to submit is under the "final" branch and is titled "CoreDataSample", we switched when we found a better solution for our database needs. If you run the project in the "GasMileageTracker" folder it has the tests in it. You can run the tests in xcode. Our Auto-Doc files are in the "html" folder and a pdf named "pdf_Appledoc.pdf"

Ryan did commit to our repository I don't know why it does not show up on this graph. Here is a picture of a list of some of his commits.

Commits on Feb 27, 2015

Trying to pull but says i need to commit
Ryan Craig authored on Feb 27   b209a20   <>

Commits on Feb 25, 2015

Whole Group Added a button
Ryan Craig authored on Feb 25   3471938   <>

added calculate button
Ryan Craig authored on Feb 25   7c97a35   <>

Gui Update
Ryan Craig authored on Feb 25   675e2f9   <>

GUi changes
Ryan Craig authored on Feb 25   816ce75   <>

Gui changes
Ryan Craig authored on Feb 25   01feda9   <>

Minor updates on GUI

Styling Tasks

1) Change background color

2) Change font color

3) Add car image to accompany name

Add a card…

Advanced Goals

3) Compare gas mileage between cars.

4) Add ad space

5) Optimize speed of app

6) Decrease size of space app uses

Add images for pages

Update GUI so its not boring

Add a card…

Stretch Goals

1) Implementing GPS Tracking system.

2) Facebook connectivity to share stats with friends.

3) Possibly scanning in numbers from trip computer on car to automatically calculate gas mileage.

2) Create car selection table.

4) Accomplish same task but with reading it from the gas pump for gallons added to car.

Add a card…

Done

Use data to get MPG
👁 💬1 ☑ 3/3 ⏰ Apr 2   DC J

Keyboard Disappear
💬1 ☑ 1/1 ⏰ Apr 2   AC DC

Display Data on page 2

Make user data usable
👁 💬2 ☑ 1/1 ⏰ Apr 2   AC J

1) Make an app that can take user input for miles driven.

4) Add functionality to track gas mileage after each calculation.

1) Show chart of previous gas mileage.
💬1   DC

Add a card…

Deployment: Deployment takes place on a Mac using Xcode or with an apple device once we get the app posted which may not be for a while as we want to continue working on the app before we submit to the app store. The only difference between this and the initial proposal is that we were unable to display you lifetime gas mileage**.**
